

# LONG TERM OUTSOURCING OF AN HSE OFFICER FOR A GOVERNMENT DIVISION

Sector	Government
Client	A Government division delivering project and facilities management to public sector assets
Service	An embedded Safety Officer outsourced on a large high profile construction project
Project Days	180

## CLIENT PROBLEM ?

The client were a Government division delivering project and facilities management to public sector assets.

Project specific roles, or roles which are not needed for the entire duration of a project cycle, often present financial, resourcing and headcount challenges to companies. Corporate OHS can help by providing outsourced health and safety Managers and Consultants for long term secondments or on a monthly retainer basis.

Highly personalized, cost and time effective. Our well qualified and experienced HSE Consultants will work in partnership with you. Dedicated and highly qualified they bring immediate, expert HSE advice whilst working as an extension of your current team.

The client found further financial benefit in the form of not having to spend budget on: staff visas, healthcare, holiday, gratuities, flights and sickness. IT infrastructure e.g. laptops and phones, onboarding costs e.g. recruitment, training, HR, payroll.

**Corporate OHS offers HSE and risk management solutions, including outsourcing.**

## **Our Solution**

An outsourced Corporate OHS HSE Consultant had already been based on site for some months prior, providing overall oversight that all matters of health and safety, including relevant HSE laws and legislation and international best practice, were being adhered to by all parties engaged on the project. This scope included the day to day assurance that the principal contractor and sub-contractors undertook their on-site operations in a safe manner and adhered to all relevant HSE procedures.

As the number of high risk activities and contractors increased on site during a specific phase of the project it was decided by the client to increase our scope to include an additional Safety Officer to work alongside the existing Consultant.

## **Summary of Outputs**

The day to day duties of the HSE Officer included:

- Daily on site HSE overseeing and walkarounds
- Implementing appropriate HSE procedures for the project
- Assisting the outsourced Corporate OHS HSE Consultant in controlling the site-based activities while ensuring that the Contractors processes are appropriate and in line with all local regulations
- Supporting the contractors with regard to risk management activities including the identification of project risks and development of mitigation strategies
- Assisting the Consultant with project safety planning and preparation
- Submission of daily HSE reports
