

RISK ASSESSMENT AND HSE REPORT REVIEW

Sector	Government
Client	A Government Authorities Head Office
Service	Risk Assessment of identified area in client Head Office Comment on previous HSE Report
Project Days	3

CLIENT PROBLEM ?

The client, a Government authorities head office, wished to re-purpose one of their existing areas. To that end, they commissioned Corporate OHS to risk assess the area, comment on the internal report as regards the project plan, review the design plans for the suggested area's amendments and provide a report giving the Senior HSE Consultants expert opinion.

This approach would give the client a full insight into any risks and hazards present in their proposed plan, allowing them to make the correct decision as to whether to go ahead with the project or not.

If they did decide to go ahead, then they could be confident that they were also acting in full compliance with all applicable laws such as; the Fire and Life Safety Code and Dubai Municipality requirements.

Corporate OHS offers HSE and risk management solutions, including outsourcing.

Our Solution

The Corporate OHS HSE Consultant helped and supported the client in the following areas.

Risk Assessment:

- Identify hazards that have the potential to cause harm
- Analyze and evaluate the risk associated with the hazard
- Determine appropriate measures to eliminate the hazard or control the risk when the hazard cannot be eliminated
- Review the supplied proposed plans against risk assessment principles

Legal Compliance:

- Determine legal and other occupational safety and health requirements applicable to clients proposed plan
- Determine how these legal and other requirements apply to the clients proposed plan
- Review the supplied plans against Federal, Emirate specific and area specific HSE laws and legislation

In addition, the Consultant reviewed the existing report compiled the clients internal resource and provided comment against it.

Summary of Outputs

The Consultant developed a Risk Assessment Report which included all of the areas included in the above section.

Within the report, the Consultant outlined a number of Findings and Recommendations, in addition to a risk matrix and risk assessment template which further outlined the associated suggested control measures against each identified hazard.
